CONTENTS

Special Issue: Molecular Vibrations, Band Intensities and Molecular Structure — A Collection of Invited Papers in Honour of Professor Michael A. Elyashevitch

Dedication ix

Structural analysis of molecules from their Raman spectrum
M.M. Sushchinskiy (Moscow, Russian Federation) 1

Regularizing algorithms for molecular force field calculations
I.V. Kochikov, G.M. Kuramshina, Yu.A. Pentin and A.G. Yagola (Moscow, Russian Federation) 13

A modified sum rule equation for the atomic tensors occurring in the theory of vibrational circular dichroism (VCD). Application to the atomic tensors recently calculated for ammonia
A. Rupprecht (Stockholm, Sweden) 35

Internal coordinates in problems of lattice dynamics
A.N. Lazarev and M.B. Smirnov (St. Petersburg, Russian Federation) 51

Variational calculations of rotationally resolved infrared properties of Li_2Na^+, $LiNa_2^+$ and $KLiNa^+$
F. Wang, D.J. Searles and E.I. von Nagy-Felsobuki (Callaghan, N.S.W., Australia) 73

Semiempirical models in theory of intensities of rotation–vibration spectra of polyatomic molecules
V.I. Berezin and M.D. El'kin (Saratov, Russian Federation) 95

Engineering calculations of optical spectra of large molecules and polymers
L.A. Gribov (Moscow, Russian Federation) 111

Vibronic theory of normal and anomalous bond angles in heteroligand complexes with multiply-bonded ligands: osmium and ruthenium nitrosyl complexes
A.A. Levin (Moscow, Russian Federation) 133

Some properties of regular and canonical force fields
V.I. Pupyshev (Moscow, Russian Federation), Y.N. Panchenko and G.R. De Maré (Brussels, Belgium), C.W. Bock (Philadelphia, PA, USA) 145

Inverse isotopic shifts in the vibrational spectra of the isotopomers of methanimine, $H_2C{=}NH$
Y.N. Panchenko and G.R. De Maré (Brussels, Belgium), C.W. Bock (Philadelphia, PA, USA) 161

An ab initio examination of the harmonic frequencies of ethylene and its isotopomers
S.H. Chough and Y.N. Panchenko (Seoul, Korea), C.W. Bock (Philadelphia, PA, USA) 179

Exclusion principle and indistinguishability of identical particles in quantum mechanics
I.G. Kaplan (Moscow, Russian Federation) 187

Transform theory for resonant Raman spectra of impurity crystals
S.N. Gladenkova and I.S. Osad'ko (Moscow, Russian Federation) 197

Electro-optical parameters of hydrogen-bonded water molecules
G.V. Yukhnevich, B.P. Shelyukhaev, G.B. Seifer and O.Yu. Tsoi (Moscow, Russian Federation) 211

Analytical properties of molecular harmonics, orbitals and potential energy surfaces
B.K. Novosadov (Moscow, Russian Federation) 235

Calculation of molecular electronic structure with the help of the Σ-separation method: preliminary results and prospective development
A.W. Niukkanen, I.V. Maslov and V.I. Perevozchikov (Moscow, Russian Federation) 265

Variational method of computing the vibrational structure of the electronic spectra of polyatomic molecules
V.I. Baranov and D.Yu. Zelent'sov (Moscow, Russian Federation) 283

Spectra and structure of organophosphorus compounds. XLV. Vibrational spectra, conformational stability, ab initio calculations, and vibrational assignment of chloromethyl difluorophosphine and chloromethyl difluorophosphine-d_2
B.J. van der Veken, P. Coppens and R.S. Sanders (Antwerpen, Belgium), F.F. Daeyaert and J.R. Durig (Columbia, SC, USA) 305
Vibrational spectra and conformations of mono- and polysaccharides
R.G. Zhbankov (Minsk, Belarus) 347
